COMPANY PROFILE

CPE Supply for Saudi Arabia
From Vendor to Operator

DISCOVER IMCAN

IMCAN connects equipment manufacturers with telecom operators and Internet service providers across Saudi Arabia.

We source customer premises equipment directly from vendors and support device testing, regulatory requirements, and operator acceptance before supply.

Our focus is equipment that meets the technical and commercial needs of the Kingdom's service providers.

ABOUT US

IMCAN

IMCAN specializes in supplying customer premises equipment to Saudi telecom operators and ISPs, including STC and Mobily.

Working directly with vendors, we align device selection with operator requirements and coordinate testing and the approvals needed for the Saudi market. Our portfolio covers fiber broadband, fixed wireless access, home networking, and voice devices.

OUR SERVICES

01 Direct Vendor Sourcing

Purchase CPEs directly from manufacturers against operator specifications.

02 Product Selection

Match device capabilities to the ISP's access technology and service requirements.

03 Equipment Testing

Evaluate supplied devices against agreed technical and network requirements.

04 Vendor Coordination

Work with vendors to address technical findings during qualification.

05 Regulatory Requirements

Coordinate required documentation and approval activities for the Saudi market.

06 Operator Supply

Sell qualified equipment to telecom operators and ISPs across the Kingdom.
